### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the claimed inventions including the components of a kiln, loading door, movable position side wall vent, heat condensation device with a side wall ventilator opposite the movable side wall vent, air deflector, tunnel shaped air shaft with ventilation unit, and dry air circulation by moisture absorbing ventilators is not found in the prior art either singly or in combination. The closest prior art are considered Freze (US 3,921,308) which discloses a tumbler dryer with a heater, a condenser, a blower and ducts, but not the claimed opposite positioned side wall ventilator from a movable side wall vent and Lewis (US 4,250,629) which discloses a kiln, a dehumidifier, bypass dampers, and wet and dry bulb sensor controlled exhaust fan but not the claimed movable position side wall vent. Examination finds no motivation or combination suggestions in those references or other prior art cited in the application such that the claimed invention would have been obvious to those skilled in the art.

As a preliminary matter, the most recent amendment in response to a notice of non-compliant amendment is considered improper such that under current Office practice, unsigned amendments can not be considered by the Office in response to an outstanding action. However, since the non-compliant response is considered proper for examination purposes as fully addressing an outstanding action and conforming with current Office practice with respect to the merits of the application, that response and applicant's most recent response is considered to fully conform with current Office practice.
